

PIPERFILL 1:1 adhesive

PiperFill is a two-component solvent free epoxy filler and adhesive. It will bond to most materials except certain plastics and steel. **PiperFill** can be used to patch holes, fill cracks, adhere objects together and anchor bolts to secure them in place.

APPLICATIONS

- Patching concrete holes
- Stitching concrete cracks
- Mixing with sawdust for decking
- Can be tinted to match a surface
- Adhering different substrates together

ADVANTAGES

- Quick curing
- No slump
- Solvent free
- Easy to mix and apply

TECHNICAL INFORMATION

- Appearance: Opaque resin
- Coverage: Dependent
- Sanding time: 1-4 hours @25c
- Water permeability: nil

PACKAGING

- White plastic jar, white lid with base
- White plastic jar, black lid with activator

DIRECTIONS

Mix one part by volume of **PiperFill** Base with one part by volume of **PiperFill** Activator. Mix together with a flat spatula until a homogenous mixture is achieved. Only add the appropriate filler (sawdust, pigment or silica substrates) into the mixture once the base and activator have been correctly mixed. Do not try thin or add any solvents.

SAFETY

Epoxy products are to be treated with care and correct PPE is to be worn. In the event of skin contact, wash well with soap and warm water. Seek immediate medical assistance for eye contact. MSDS is available on request.
